The perfect solution for:

Domestic Homes Apartments Small Businesses Schools

The Nanto Lite can be installed either under or above the bathroom or kitchen sink, providing adaptability and space-saving solutions to suit the users needs. Designed to save energy, they feature a copper immersion heaters that are submerged in water offering faster reheat-up times and are ErP rating A.

To minimise heat loss and increase the hot water heater's efficiency they feature a diamond enamelled tank that is surrounded by high density CFC free polyurethane foam insulation to increase the duration of the hot water within.

They come equipped with an analogue dial to quickly adjust the temperature and also allowing the user to switch between eco and vacation

mode with ease. The Nanto Lite's eco mode heats the hot water to an efficient 55°C while vacation mode drops the water heater's temperature to 7°C reducing overall energy consumption, improving the water heater's energy efficiency, and offering savings to the household owner.
