■ GEBERIT

# In perfect harmony.

Geberit flush plates  
and Geberit flush buttons

# Stylish design. In every detail.

With a Geberit concealed cistern, only the flush plate is visible – two buttons that release either a large or small quantity of water. The focus here is on reliable functionality, but Geberit also knows design is of the utmost importance. A wide range of design solutions offering different surfaces and shapes, giving you the aesthetic freedom to create the bathroom you always wanted.

# Pure design.

## Geberit Sigma80

### True innovation.

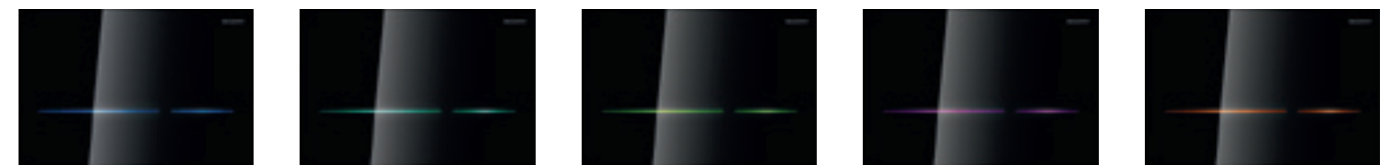

The innovative Geberit Sigma80 flush plate only requires the wave of a hand to initiate the flush process. An automatic standby system ensures that electricity consumption is kept to a minimum. The touchless flush plate is available in two glass versions: black or with a mirror surface.

2012

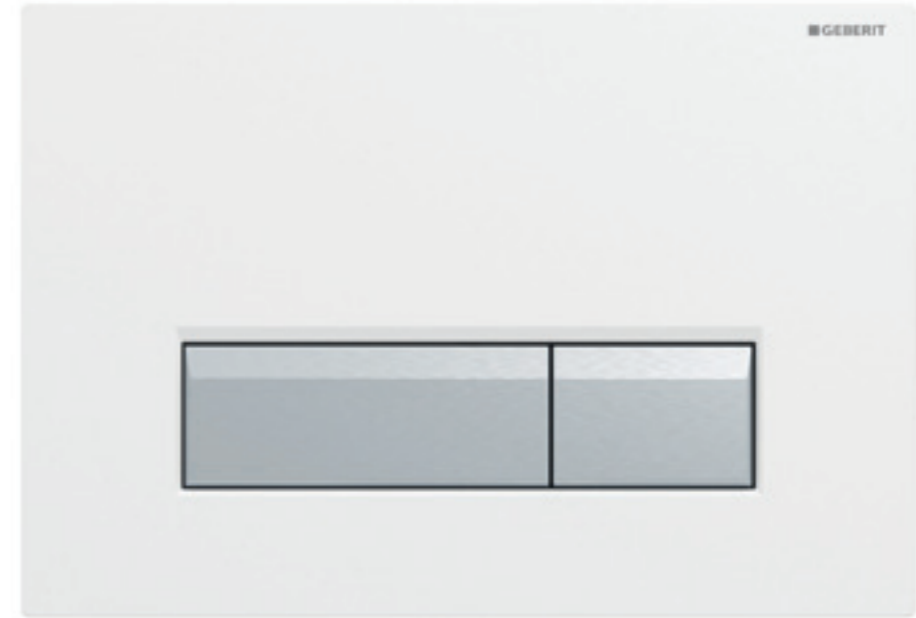

Comes equipped with five different colour settings for the button lights

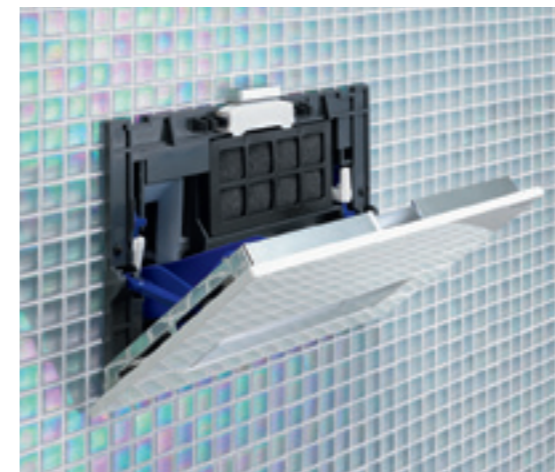

## Fresh air included. Geberit DuoFresh with odour extraction.

The Geberit DuoFresh is an innovative system that keeps a bathroom smelling fresh. The secret is behind the wall. With the press of a button, air in the WC ceramic appliance is extracted and purified through an active carbon filter. No need for air fresheners – odours do not even have a chance to disperse throughout the room such as with common bathroom ventilation systems. The fold-open flush plate provides quick access to the filter and insert for in-cistern blocks.

**DESIGN PLUS**  
powered by: **ISH**

# Make a smooth appearance.

Geberit Sigma60

For a surface even finish.

**New! Perfection without edges**  
Geberit Sigma60 sets the flush plate surface even with the wall. Its ultimate streamlined design has no edges or protruding elements, enhancing the overall feeling of spaciousness in your bathroom. The new Sigma60 actuator plate is compatible with Geberit Sigma concealed cisterns and is easy to clean.

**Quality and reliability.**  
Over generations.

Geberit concealed cisterns have been a success worldwide for over forty years. These space-saving WC systems stand out for their beautiful design but also for their high reliability. With a Geberit concealed cistern, you can be sure that you will enjoy your bathroom for years to come. Geberit also offers a 25-year guarantee for spare parts availability on components that are critical for function, another sign that quality is one of our highest priorities.

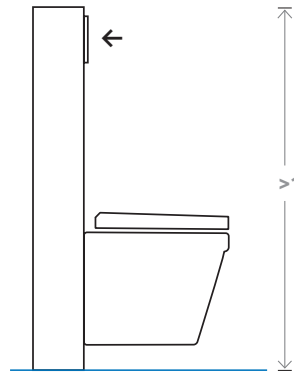

**The possibilities  
are endless.**

# Flush plates.

## For Geberit Sigma concealed cisterns (UP320/UP720).

- Geberit Sigma concealed cisterns (UP320/UP720) require a construction height of at least 110 cm
- (Pre-) wall depth at least 10 cm
- Front actuation
- Guaranteed availability of spare parts that are critical for function for 25 years
