

Glow•worm
The energy you need

MiGo

Your personal heating
assistant

Key Features

- **Remote heating and hot water control**
Manage your temperature, heating and so much more from anywhere with our intuitive easy-to-use smartphone app.
- **MiGo automatically learns your energy needs**
From the moment MiGo is installed it begins to learn your home's energy needs, so when you ask for 21°C, you get 21°C without the wait.
- **Maximises the efficiency of your boiler**
MiGo speaks the same language as your boiler to ensure you're only using the required amount of energy, saving you money.
- **Over 75 years of experience**
Our solutions are the result of more than 75 years of expertise in heating technology.

Increased comfort and savings. MiGo makes it all possible. Control your heating and hot water needs from your smart phone even when you're away. Increase your comfort, lower your energy bills.

Full cost-saving potential. Because MiGo has been exclusively engineered to work with our new and existing boilers, you'll save more energy and money than with any other Wi-Fi enabled thermostat.

Internet weather compensation. MiGo only ever uses your energy as and when it needs to. It makes a calculation based on its location and the surrounding weather stations to obtain the outside temperature for your property, all without the need for a separate external temperature sensor.
