FOOD WASTE DISPOSERS
& STEAMING HOT WATER TAPS

in **sink** erator®

Welcome to the **cool, calm, convenient** world of InSinkErator®

90 years ago we invented the food waste disposer. Today we've perfected it.

InSinkErator UK is part of the Emerson Corporation - a global technology and engineering leader. InSinkErator is recognised as the market leader and world's largest manufacturer of food waste disposers.

Our food waste disposers and steaming hot water taps are designed for modern living and busy lifestyles. Whether you are a small or large family, love entertaining or live on your own, these appliances will suit any style of kitchen.

Safe, reliable, efficient and affordable, these innovative products provide a convenient and instant solution. They will make your life easier, giving you more time for yourself.

FOOD WASTE DISPOSERS

STEAMING HOT WATER TAPS

FOOD WASTE DISPOSERS

InSinkErator disposers can grind almost any food waste, however there are some things you should not put down the plug hole in general.

✓ Do dispose of:

✗ Do NOT dispose of:

Quiet, clean, safe & extremely convenient

As the inventor of the food waste disposer, InSinkErator has developed and perfected through the years innovative models using advanced technology to suit today's needs. The world-leading brand brings you a responsible answer to the growing problem of food waste.

These 'must have' sink appliances hygienically and safely dispose of food waste at the touch of a button. No more mess, smelly bins, insects or bacteria.

Say goodbye to overflowing bins

Food waste decomposes in bins, resulting in an unhygienic cocktail of the week's waste. It's not only unpleasant but if it ends up in landfill it's methane emissions are extremely bad for the environment.

Using an InSinkErator disposer not only reduces the amount of waste in your bins and removes the bacteria and smells from rotting food. It's also a responsible choice, allowing the capture of value from your food scraps at the wastewater plant.

Help keep food waste out of landfill sites

Food waste is a growing problem

We all need to do our bit to help preserve the environment. We waste £13b worth of food every year in the U.K. A part of that ends up in landfill where it emits harmful greenhouse gasses.

7 million tonnes of household food **goes to waste each year.**

Source: www.wrap.org.uk

That's **£13 billion of food** purchased and **thrown away.**

Part of that waste **goes to landfill sites**, where it emits harmful greenhouse gasses.

This could yield renewable energy or natural fertiliser but just 10% is separately collected and less than 7% is home composted.

19 million tonnes of greenhouse gasses are produced every year, just from household food waste.

1 Your food waste is ground into tiny particles by your InSinkErator disposer...

Instead of going to landfill, food waste can yield valuable biogas and other vital soil nutrients which can be recovered at the wastewater plant.

2 These are flushed through your plumbing to wastewater treatment...

3 Where they can yield valuable biogas

4 ...and fertilizer for agriculture

THE EVOLUTION RANGE

THE ULTIMATE IN FOOD WASTE DISPOSAL

DESIGNED WITHOUT KNIVES OR BLADES

As easy as 1, 2, 3

There are three simple steps to using InSinkErator waste disposers:

- 1 Turn cold water tap on
- 2 Press button
- 3 Push food waste into sink

The Evolution range of food disposers can dispose of virtually any food waste.

Easily grinds:

- ✓ Chicken bones
- ✓ Banana peel
- ✓ Avocado skins

Perfect for:

- Amateur chefs
- Cooking enthusiasts
- Food lovers
- Busy households

Comes with sink stopper

STEAMING HOT WATER TAPS

The modern kitchen is the heart of the home, where **we all love to gather and spend time with friends and family**. With space constantly in demand, we all need clever ways to simplify cooking and de-clutter the kitchen.

ENERGY EFFICIENT

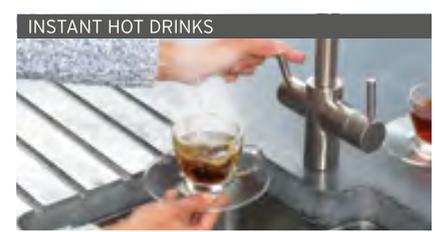

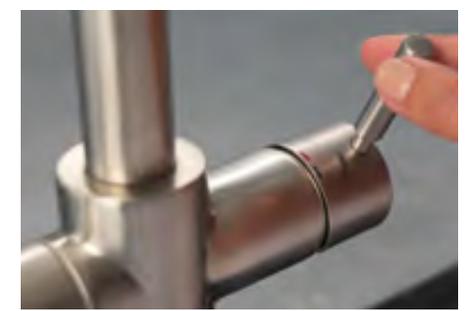

An InSinkErator steaming hot water tap **uses less energy than a 40-watt light bulb**

Smart looking for smart cooking

Instant tea, coffee or any other hot drink is always nice. However that's just the tip of the iceberg when it comes to how many uses you'll find for your 3N1 steaming hot water tap.

Once you have one, you'll wonder how you ever managed without it. No kettles, no leads, no clutter. Just up to 98°C steaming hot filtered water at the touch of a lever.

- Make a cuppa in 8 seconds
- Space saving for smaller kitchens
- Save electricity by not having to heat more water than you need
- Simplify kitchen tasks
- On demand steaming hot water for cooking

Let the 3N1 steaming hot water tap do the work for you

A perfect fit

The InSinkErator models not only suit any kitchen style, they deliver speed and efficiency giving you convenience and control at every use.

- Premium Italian design
- A range of finishes to suit any kitchen
- Easy installation
- Space saving for smaller kitchens

3 functions 1 product

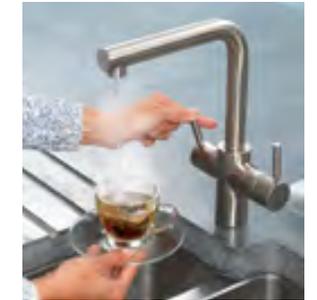

The 3N1 premium steaming hot water tap allows you to switch between filtered steaming hot, and regular hot and cold water for countless tasks such as making hot drinks, cooking and cleaning.

Regular cold water

Regular hot water

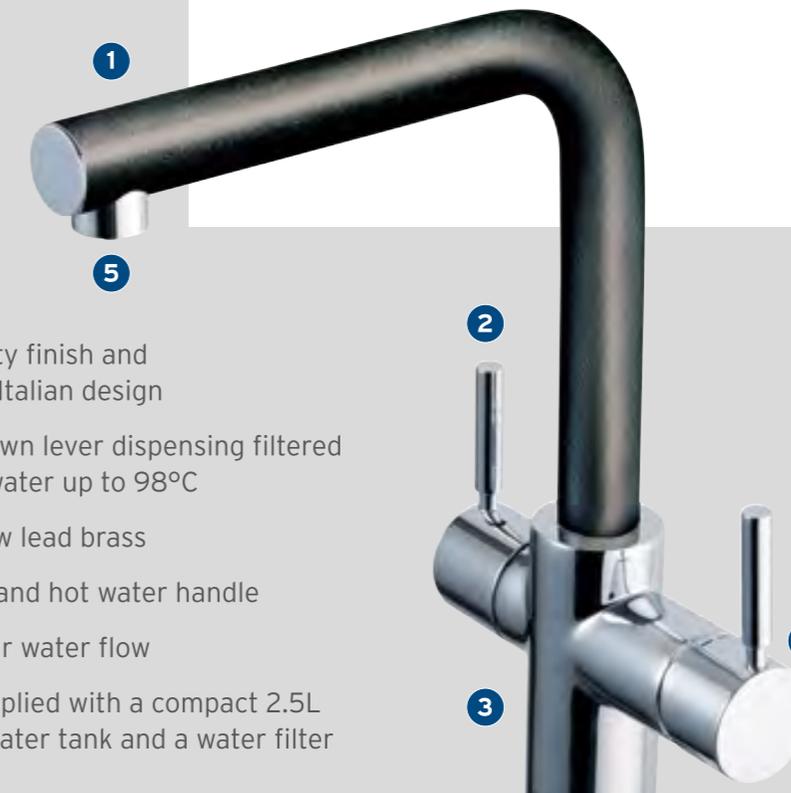

Filtered steaming hot water

Up to 98°C - the perfect temperature for hot drinks and cooking

Features

- 1 Premium quality finish and contemporary Italian design
- 2 Safety push down lever dispensing filtered steaming hot water up to 98°C
- 3 High quality low lead brass
- 4 Easy grip cold and hot water handle
- 5 Smooth laminar water flow
- 6 Each tap is supplied with a compact 2.5L space saving water tank and a water filter

Water tank comes with a 2 year warranty

Choose from 3 classic metal finishes

Just as easily retro-fitted as it is integrated into a brand new kitchen design, the 3N1 kitchen tap provides an effortless update to your home.

For optimal performance, replace your InSinkErator water filter every 6 months. Online purchase available at www.insinkerator.co.uk

InSinkErator has gained the approval of the Water Regulation Advisory Scheme (WRAS) for our taps and the heater water tank dispensing up to 98°C - often quoted as the ideal temperature for tea.

Installation is easy

Whether your requirement is for a completely new kitchen, or planned as part of a kitchen upgrade or retro-fit unit, InSinkErator food waste disposers and steaming hot water taps are equally easy to install.

Retro fitting is a great way to upgrade and improve your kitchen. Improving the style and functionality will definitely add value too.

Improve your kitchen. Make life easier.

See our installation guide videos at www.insinkerator.co.uk

INSTALLING FOOD WASTE DISPOSERS

InSinkErator food waste disposers fit neatly under standard sinks, connecting to standard plumbing with an electrical connection required.

INSTALLING STEAMING HOT WATER TAPS

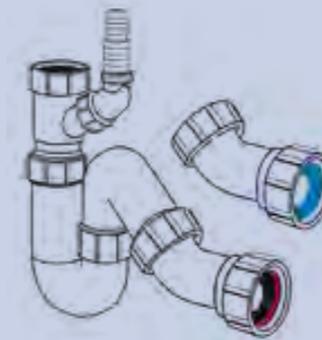

Just as easily retro-fitted as it is integrated into a brand new kitchen design, the choice of an InSinkErator steaming hot water tap will provide you with an easy to fit, effortless update to your home.

OPTIONAL ACCESSORIES FOR FOOD WASTE DISPOSERS

Plumbing Kit

Should you wish to install your disposer yourself the plumbing kit contains the necessary items.

Extended Flange

For sinks deeper than 20mm the extended flange is available.

Batch Feed Kit

Rather than using an air-flow switch you can purchase a Batch Feed Kit, allowing you to turn on the unit from the disposer cover. This option is available for the Evolution 100 & 200 models only.

All accessories are available at www.insinkerator.co.uk
