

ALPHA1 AFFORDABLE ENERGY EFFICIENCY

The ALPHA1 is a cost-efficient yet high-performing circulator. The reliable pump is the ideal choice in applications where the well-known UPS has been used to fulfil basic circulator needs.

The ALPHA1:

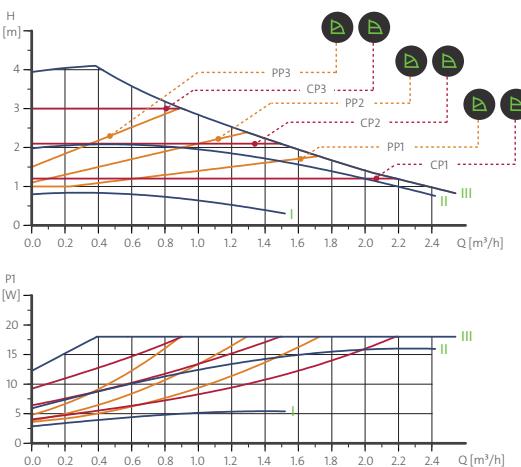

- is based on the field proven ALPHA2 with more than 3 million units sold
- cuts energy consumption by up to 80% compared to traditional pumps
- uses as little as 81 kWh per year (based on 150 m² standard house with 6840 heating hours per year)
- is adaptable to any type of heating system – one- or two-string – with radiators or under floor heating.

TECHNICAL DATA

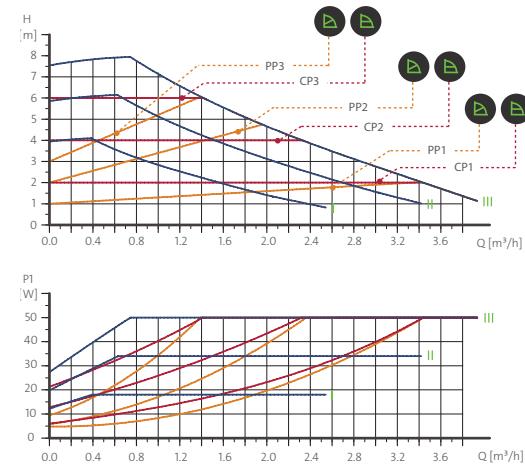

Supply voltage:	1 x 230 V – 50/60 Hz
Flow rate, Q_{max}:	2.4 m ³ /h
Liquid temperature:	+2° C to +110° C (TF 110)
System pressure, P_{max}:	1.0 MPa/10 bar
Power Range:	3-50 W
Ambient temperature:	0° C to +40° C
EEI:	≤ 0.20
Enclosure class:	IP X4D
Insulation class:	F

PERFORMANCE CURVES

ALPHA1 XX-80

ALPHA1

KEY FEATURES

Everything under control

- 9-segment power display provides an easy overview of all that is going on in the pump

Proportional pressure mode

- If the proportional pressure mode is selected, the differential pressure varies proportionally with the flow, i.e. higher flow means higher differential pressure
- Proportional pressure is the preferred choice for two-string systems with high flow variation
- Proportional pressure curve (high and low)

Constant speed mode

- Three constant speed modes for constant flow applications

Constant pressure mode

- The pump maintains constant pressure regardless of the flow
- The preferred operation mode for under floor heating and one-string systems with low flow variation
- Constant pressure curves (low and high)

Easy operation

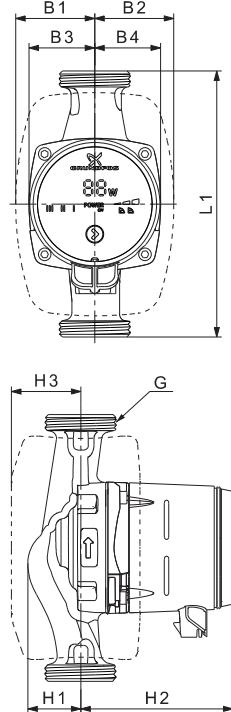

- Intuitive one-touch operation makes control mode selection simple

Easy connection

- The ALPHA plug makes electrical installation easier than ever before

TYPES AND DIMENSIONS
