Hanging the mirror

Installation Tools

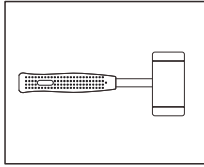

Measuring tape

Spirit level

Drill

Hammer

Screwdriver

Pencil

Installation Steps

Make sure the wall is solid and suitable for safely supporting the overall weight of the mirror once installed.

Use a pencil to measure and mark the positions of the mirror nails, securing screws, and Rawl plugs. At the same time, use a spirit level to ensure the bracket is perfectly level.

Select a $\phi 6$ drill bit and drill holes in the marked area to a depth of 40mm. (If the wall is tile, use a special ceramic drill).

Insert Rawl plugs into drilled holes, and then screw the hook into the hole.

Hang the product on the wall hook.

Recycling and disposal

Please recycle the packaging in accordance with your local government regulations on waste handling, and follow the same advice at the end of the products life.
