HEAT PUMPS | OIL BOILERS | CYLINDERS

OVER 50 YEARS OF HEATING

Since 1968 Warmflow has created innovative, award-winning heating products for homes in the UK and Ireland.

All Warmflow products are made at our state-of-the-art manufacturing facility in Lisburn, Northern Ireland. Our extensive range of home heating products offers value for money, fuel efficiency, ease of installation and all supported by top-class customer care.

Our comprehensive product portfolio, which includes the UK and Ireland's only AA rated combi boiler, offers a choice of highly efficient liquid fuelled boilers as well as range of intelligent renewable products and a selection of cylinders, which will satisfy the needs of the most demanding households.

At Warmflow, we pride ourselves on leading the way in innovation, working with customers to ensure that:

- we manufacture products that are easy to install and service
- our products are made using only the highest quality materials
- our products deliver the highest possible efficiency levels and cost savings.

MCS

Our products have been independently tested and accredited. Our range of appliances exceed the minimum ErP efficiency requirements and comply with Document L1A, L1B (England & Wales), The Building Standards (Scotland) Regulations Section 6, Approved Document Part F (Northern Ireland) and with the HARP efficiency requirements for Part L (Republic of Ireland).

Agentis

OIL BOILERS

Our outstanding selection of high efficiency, internal and external HVO-Ready boilers - including the UK & Ireland's only AA-rated oil boiler - will keep your customers and their loved ones warm and cosy during the chilly months ahead.

WARMFLOW
Agentis
High Efficiency Oil Boiler

★ Trustpilot

I have been fitting warmflow boilers for several years and can not fault them one bit. Competitive price and a high quality build. The warmflow team could not be more helpful unlike competitors. Nice as an installer to have regular contact and professional development with a team determined to make the installation of an oil fired boiler as easy and painless for both installer and consumer. Highly recommended.

*HVO Future Ready subject to commissioning.

High Efficiency Oil Boiler

WARMFLOW

AVAILABLE AS
WARMFLOW
PROFESSIONAL

INTERNAL HEAT ONLY

I21 / I26 / I33 / I44

- High-efficiency condensing Internal range
- Designed to fit into any kitchen or utility room
- The latest Riello low NOx technology

AVAILABLE AS
WARMFLOW
PROFESSIONAL

INTERNAL PUMPED

I21 P / I26 P / I33 P / I44 P

- Riello low NOx technology
- Factory-fitted Grundfos UPM3 FLEX AS circulating pump
- Factory-fitted automatic air vent
- Factory-fitted 3 bar safety valve

INTERNAL OIL BOILERS

Designed to fit specifically into kitchen and utility rooms, its stylish white casing houses a highly efficient patented heat exchanger and the latest Riello low NOx technology.

WARMFLOW

All Warmflow Professional models come with:

OVER
£250

WORTH OF
ADDITIONAL COMPONENTS

See page 10 for more details.

Save up to 5 litres of fuel per week compared to other brands with the UK & Ireland's only AA-rated oil boiler*

Unique "Easy-Fit" balanced flue system - 1 flue fits all boilers

Patented high-efficiency heat exchanger

New slimline design integrates seamlessly into any kitchen or utility room

Latest Riello low NOx technology exceeding legislative requirements

Range of outputs from 15 – 44kW

AVAILABLE AS
WARMFLOW
PROFESSIONAL

INTERNAL SYSTEM

I21 S / I26 S / I33 S

- Riello low NOx technology
- Factory-fitted Grundfos UPM3 FLEX AS circulating pump
- 12l Expansion vessel
- Factory-fitted automatic air vent
- Factory-fitted 3 bar safety valve

AVAILABLE AS
WARMFLOW
PROFESSIONAL

INTERNAL COMBI

I21 C / I26 C / I33 C

- AA Rating on M & XL load profile
- Riello low NOx technology
- Factory fitted Grundfos UPM3 FLEX AS circulating pump
- 24l Factory-fitted, hinged, expansion vessel
- Low component count
- DHW Expansion vessel
- DCW Inlet shut-off valve
- Factory-fitted DCW pressure reducing valve
- Push-in O-ring fittings
- Slimline design
- Integrated 7-day programmer
- Patented design

High Efficiency Oil Boiler

BOILERHOUSE OIL BOILERS

The Boilerhouse range has been specifically designed for boiler house and garage applications and is suitable for indoor installation.

Its blue casing houses a highly efficient heat exchanger that can be easily accessed for servicing. The latest in Riello low NOx burner technology makes the Boilerhouse range quiet in operation and the perfect choice in oil-fired boilers.

All Boilerhouse models are fully factory wired with burner and thermostat and are supplied with a factory-fitted condensate trap as standard. The appliance has flow and return connections off the top for ease of plumbing.

Range of outputs from 15 – 33kW

GOOD TO KNOW

The Boilerhouse Boilers are supplied with a pre-wired, factory-fitted burner and thermostat. Only one IEC mains socket (supplied) needs to be wired on site.

AN ENVIRONMENTAL INVESTMENT

Designed to be environmentally friendly, Warmflow boilers are highly efficient in operation and are ErP A-rated.

FLUE & PLUME MANAGEMENT KITS

Warmflow’s Easy-Fit, plastic flue systems have been specifically designed for use on high efficiency, condensing oil boilers.

With the Warmflow Agentis range, you don’t need to carry different flue systems for different jobs - with us, one flue will fit all our boilers. Additional benefits include the locking clamp arrangement which offers superior rigidity and security compared with traditional push-fit flues. Since the flue system is plastic all extension and terminal sections can be easily cut to length as required.

All flue kits include:

- Boiler adapter and starter piece
- End terminal
- Flue fittings kit
- Thermal guard (FBF)
- 1000mm extension (HBF)
- 87° bend (HBF)

Scan to watch the Internal flue video

Scan to watch the External flue video

VBF available in stainless steel.

Horizontal Flue Kit (FBF)

Vertical Flue Kit (VBF)
(Available in Stainless Steel)

High Level Flue Kit (HBF)

In instances where discharging flue gasses at low level may cause a problem, such as in a small courtyard or narrow passageway, a Plume Management Kit may provide a useful addition to a standard low-level flue. The kit features extensions and bends in 80mm black UV-stabilised polypropylene and also includes adjustable mounting brackets. Plume Management Kits are suitable for all models up to 44kW (see notes).

Note: FBF kit also required
Utility (Internal) Plume Management Kit (U-PMK)

Kabin-Pak (External) Plume Management Kit (K-PMK)

KEY

- A - Diverter elbow
- B - 860mm extension
- C - 87° bend
- D - Terminal insert
- E - Adjustable bracket
- F - 45° bend

The following components are available separately

Note: The Utility (Internal) Plume Management Kit (U-PMK) is designed to extend an FBF flue kit. Both an FBF and U-PMK are required to assemble the complete flue.

HE FLUE KIT ACCESSORIES

F3 - 1000mm extension pipe

F4 - 500mm extension pipe

F7 - 45° bend

F8 - 87° bend

F10 - conventional flue adapter

F11 - pitched roof flashing

F12 - flat roof flashing

F14 - terminal guard

FLUE LENGTH CALCULATION

BOILER OUTPUT (kW)	TOTAL EQUIVALENT FLUE LENGTH (m)	
	Vertical Balanced Flue	High/Low Level Balanced Flue
15	8.0	5.0
21	8.0	5.0
26	8.0	5.0
30	6.0	3.5
33	4.0	2.5
44	4.0	2.5

Note:

1. All flues can utilise any combination of bends, straights, adapters and terminals.
2. Ensure flue is arranged such that it falls continuously towards the boiler.
3. The Low Level, High Level and Vertical Balanced Flue Systems can use any combination of flue extension pieces up to the maximum equivalent length depending upon boiler output as illustrated in the table.

FLEXI LINER KITS & ACCESSORIES

With Warmflow's flexible flue liners, connecting a condensing boiler to an existing chimney couldn't be easier. No separate combustion air supply is needed as our flue liners use the chimney for the supply of combustion air, providing a room-sealed installation.

With the Agentis range, you don't need to carry different flue systems for different jobs - with us, one flue will fit all our boilers.

Four kits are available in a choice of either 6 metre or 10 metre flexible sections, with either vertical or horizontal entry options. The connection between the boiler and chimney is made using Warmflow's plastic flue system, so both the flexible liner within the chimney and the rigid flue connecting the boiler can easily be cut to length as required.

Flexi Liner Kits are suitable for all indoor models up to 26kW. For outputs in excess of 26kW, please consult our Customer Care Centre.

All 4 kits include:

- boiler adapter
- vertical starter piece
- flue fittings kit
- flue thermostat
- chimney closure plate
- terminal section
- flexible liner
- liner spacers and couplings

Horizontal kits also include:

- 2 x 0.5 metre balanced flue extensions
- 1 x 87° balanced flue bend
- 1 x 87° liner support elbow

Vertical kits also include:

- 1 x 0.5 metre balanced flue extension

Vertical Entry Kit

VFL6 = 6m vertical entry kit

VFL10 = 10m vertical entry kit

Horizontal Entry Kit

HFL6 = 6m horizontal entry kit

HFL10 = 10m horizontal entry kit

Hot Water Cylinder

The ideal choice for mains pressure, hot water cylinders. A water heating masterpiece.

QUALITY DESIGN WITH BUILT-IN RELIABILITY

The cylinder range from Warmflow has been designed to satisfy the hot water needs of even the most demanding consumer. The innovative design of our range of WRAS approved, unvented cylinders ensures that you benefit from the large hot water volumes.

From the large heat exchangers to the high performance foam insulation, no effort has been spared in developing these market leading hot water cylinders.

Our unvented cylinders work at mains pressure, so they provide outstanding hot water flow rates, far exceeding those experienced with a combi boiler or traditional vented cylinder. As a result, baths fill quickly and showers are invigorating. In addition, due to the inlet control group we supply with a balanced cold water connection, all the hot and cold taps in the house operate at the same pressure and blending valves work at their best to ensure consistent, comfortable hot water temperatures. For ease of installation cylinder connections are made using compression fittings reducing installation time & cost.

Rather than using thin wall corrugated flexible tube for our heat exchanger coils, we use rigid smooth wall exchangers formed from high quality stainless steel pipe, as we believe this provides greater stability, quality and durability. Our coils are formed from long lengths of pipe, so they have large surface areas for heat transfer.

All our models are manufactured from high quality duplex stainless steel, a strong and lightweight material ideal for unvented cylinders. Our range is fully third-party tested, approved and certified. Employing patented design features, innovative manufacturing techniques and industry best practice, our cylinders have a 'crevice-free' construction which, combined with the use of Duplex stainless steel, ensures corrosion resistance and a long service life.

This, and the fact that we test every cylinder to in excess of the maximum pressure it will experience in operation, means we can confidently offer a 25 year warranty*. So peace of mind comes as standard.

SOLAR PV

Thinking about, or have Solar PV?

The immersions on all Nero Cylinders are compatible with 3rd party Solar PV immersion controllers.

AN ENVIRONMENTAL INVESTMENT

We use a thick layer of high quality polyurethane insulation, saving precious fuel and reducing carbon dioxide emissions.

Our insulation is also CFC/HCFC-free, has a zero Ozone Depletion Potential (ODP) and a Global Warming Potential of only 2. Due to the large surface areas of our heat exchangers it is also possible for a condensing boiler to work in condensing mode for longer, and cycle less frequently when heating the hot water, thereby helping to further reduce fuel use and emissions.

TRIPLE COIL TR290V

TWIN COIL TW240UV

HEAT PUMP HP200UV

TWIN COIL TW170UV

INDIRECT 140UV

DIRECT DI110UV

* Subject to terms & conditions.

EASE OF INSTALLATION

Our cylinders are supplied with all the necessary parts for a quick, easy, professional installation. We supply only high-quality components from recognised, market-leading suppliers.

COMPONENTS SUPPLIED INCLUDE

- Inlet group complete with strainer, pressure-reducing valve, balanced cold connection (except vented)
- Incoloy 3kW immersion heater(s)
- 2 Port zone valve (except Direct, Heat Pump & vented models)
- Expansion vessel complete with hanging bracket (except Vented models)

Available in Indirect, Twin Coil, Twin Coil (Vented), Triple Coil (Vented), Direct and Heat Pump models

Volumes from 110 to 290 litres

Duplex stainless steel construction

316 stainless fittings and grey leathergrain casing

High performance rigid coils

INDIRECT CYLINDER (UNVENTED)

Available in six sizes from 110 to 290 litres to suit the vast majority of domestic installations, our Indirect models are the core of our cylinder range.

Thanks to their large surface area and high performance heat exchange coils, the Indirect models boast impressive heat-up times - the 170 litre model taking just 25 minutes to reach 60°C from cold.

Our Indirect models, like the rest of the unvented range, are designed to be fed directly from the mains water supply via the inlet group supplied, which is capable of receiving incoming water at pressures up to a maximum of 16 bar.

In order to achieve the best performance from our unvented cylinders, the mains water supply must be capable of supplying a flow rate of at least 20 litres per minute with a dynamic pressure of at least 1.5 bar. Should the supply performance be less than this the hot water flow rates will be reduced, however a Warmflow unvented cylinder may still be installed and the benefits of a fast heat-up time and minimal heat losses can still be enjoyed.

TWIN COIL CYLINDER (UNVENTED)

Our Twin Coil unvented models have all the features and benefits of the Indirect models but come with an additional coil for use with a renewable heat source, or an additional boiler. The models feature large dedicated renewable volumes, making them suitable for use with solar thermal systems in line with the recommendations in the Domestic Building Services Compliance Guide.

The renewable coil (the lower of the two coils) has a large surface area to maximise the use of available low grade heat from a renewable resource. The immersion heater and cylinder thermostats for both coils are supplied. Twin Coil models (200 litres & above) feature a dedicated 22mm connection for use with a secondary return (pumped circulation).

TRIPLE COIL CYLINDER (VENTED)

Our Triple Coil vented cylinders feature a total of three 22mm heat exchanger coils. This flexibility means that, for example, the cylinder might be heated by a solar thermal system via the renewable coil, a wood pellet boiler supplying the primary coil and a back-up oil or gas boiler on the tertiary coil.

DIRECT CYLINDER (UNVENTED)

The electrically heated Direct cylinders are designed for instances where the use of fossil fuels is impractical or unavailable. Featuring two immersion heaters, one heating the entire cylinder volume and the other heating a boost volume at the top, the cylinders are able to make use of the Economy 7 tariff in order to minimise the cost of hot water.

If used in this way, the cylinder should be sized to provide the complete anticipated daily hot water use, thereby reducing the use of the boost element which runs on the more expensive standard tariff.

Nero

BUFFER TANK

Warmflow Nero Buffer Tanks are made from high-quality, duplex stainless steel and are of crevice-free construction maximising product durability. Floor-standing, and available in both 110 litre and 200 litre capacities, the Nero Buffer Tank is the perfect solution for any installation scenario where increased thermal capacity is required.

They are suitable for heating systems incorporating all manner of heat sources, including ground and air source heat pumps, biomass boilers, as well as liquid-fuelled or gas-fired appliances. High insulation levels reduce product heat loss, offering enhanced thermal efficiency, reduced heating system cycling, and providing consistent, demand-oriented heating system performance.

WARMFLOW
Zeno

Get Ready for the Warmflow Zeno R290 Air Source Heat Pump—the ultimate solution for efficient, eco-friendly heating.

Designed with cutting-edge technology, the Zeno R290 harnesses the power of R290 refrigerant to deliver exceptional performance while minimizing environmental impact. With its sleek design and advanced features, including full remote controllability via our Warmlink app, this heat pump provides reliable warmth and comfort for your home, ensuring optimal energy savings year-round.

The Zeno R290 is ultra quiet with its silent operation, making it one of the quietest heat pumps available. It delivers high domestic hot water temperatures for enhanced comfort and convenience, all while saving installation time with its user-friendly setup. Plus, this unit qualifies for grants in England, Scotland, and Wales, making it an even more attractive choice for homeowners looking to invest in sustainable heating.

Experience a new era of heating with the Zeno R290, where efficiency meets innovation for a sustainable lifestyle.

WARMFLOW

Why Warmflow Zeno R290?

3 MODELS
9kW | 15kW | 22kW
ALL SINGLE PHASE

ENVIRONMENTALLY FRIENDLY
REFRIGERANT
R290 refrigerant, a natural refrigerant, with a low GWP (Global Warming Potential) of 3.

ULTRA QUIET OPERATION
All products have super quiet operation with sound levels as low as 41db (A).

BUILT IN HIGH EFFICIENCY PUMP
Fully integrated Grundfos high efficiency pump for the heating circuit.

USER-FRIENDLY TOUCHSCREEN INTERFACE
Covering all aspects of heat pump and system control; the brain of the system.

HIGH TEMPERATURE HOT WATER
Flow temperatures of up to 75°C. Reducing the need for immersion back-up and disinfection cycles.

WARMLINK APP CONTROL
Remote control & diagnostic capability through the cloud based app.¹

QUALIFIES FOR **GOVERNMENT GRANT**
Qualifies for grants available in England, Scotland & Wales.²

FREE DESIGN SERVICE
We offer a free in-house specification service. Simply send plans to salesgb@warmflow.co.uk

¹Warmlink access is currently complimentary and subscription-free; however, charges may apply for this service in the future. GSM access dependant on service provider coverage.

²subject to terms & conditions.

Anti-corrosion coastal protection required within 2km of the coast.

ZENO WIRING CENTRE

Streamline your installation by using the NEW Warmflow Zeno wiring centre, making it easier for engineers to manage and set-up the heating system quickly & efficiently. Available as an added accessory. See price list for details. Suitable for R290 models only.

R32

WARMFLOW Zeno

AIR SOURCE R32

Air to water heat pumps are an increasingly popular choice for homeowners. They can be easily integrated into heating systems, offer excellent energy savings and can help reduce your carbon footprint. Designed to work in lower temperature conditions they are suitable for installation in a wide range of accommodation including smaller houses to larger properties. Electricity is required to operate the appliance resulting in approximately 75% of the energy used coming from renewable sources helping to reduce your carbon footprint.

Using technology which is similar to that which is used in a common household fridge, our Zeno heat pump harnesses the natural heat energy from the air by blowing it through a highly finned evaporator coil. The heat pump then increases the temperature and the heat is used to provide heating & hot water for your home. All Warmflow Zeno air source heat pumps come with Warmlink, Warmflow's cloud based remote control technology which provides effortless and easy to use remote control access for engineers.

Why Warmflow Zeno?

3 MODELS
Zeno 8kW, 12kW & 20kW

ENHANCED VAPOUR INJECTION (EVI) TECHNOLOGY
Extends the operating envelope of the unit.

QUIET OPERATION
All products are Quiet mark approved with super quiet operation. Sound level as low as 54db (A).

ELECTRONIC CONTROLLED EXPANSION VALVES
Optimising system efficiency by allowing the heat pump to run at a range of flow temperatures and capacities.

VARIABLE SPEED-INVERTER DRIVEN COMPRESSOR
Low noise, high efficiency Panasonic rotary compressor; the heart of the system.

HIGH FLOW HEAT EXCHANGERS WITH LARGE SURFACE AREA
Maximising the heat supplied to the property whilst maintaining high flow rates for efficient operation.

USER-FRIENDLY TOUCHSCREEN INTERFACE
Covering all aspects of heat pump and system control; the brain of the system.

LOW CURRENT
Designed to run from a standard single-phase domestic electricity supply.

BUILT IN HIGH EFFICIENCY PUMP
Fully integrated Grundfos high efficiency pump for the heating circuit.

INSTALLER FRIENDLY
Includes a number of installation friendly features as standard which will help facilitate a smooth installation.

FREE DESIGN SERVICE
We offer a free in-house specification service. Simply send plans to salesgb@warmflow.co.uk

WARMFLOW
Nero
Hot Water Cylinder

WARMFLOW HEAT PUMP CYLINDERS

The Warmflow cylinder range has been designed to satisfy the needs of even the most demanding household.

The innovative design of our range of heat pump cylinders ensures that you benefit from the largest hot water volumes, shortest heat-up times and lowest possible heat losses.

Available in four sizes from 170 to 290 litres to suit the vast majority of heat pump installations. Thanks to their large surface area and high performance plate heat exchanger, the heat pump models boast impressive heat-up times - the 170 litre model taking just 25 minutes to reach 60°C from cold.

Our Heat pump models, like the rest of the unvented range, are designed to be fed directly from the mains water supply via the inlet group supplied, which is capable of receiving incoming water at pressures up to a maximum of 16 bar.

Equivalent coil surface area of 2m².

A RANGE OF PACKAGES TO SUIT ALL YOUR INSTALLATION REQUIREMENTS

All of our Zeno air source heat pumps come with a basic kit which comprises of a touch screen, intelligent controller, factory fitted Grundfos circulating pump & heated drip tray.

In addition, we offer a range of custom packs which include our very own Warmflow branded heat pump cylinder offering further value and a one stop shop to ensure your installation is as easy as possible. All the packs have been designed to enhance value for our customers and include only the finest quality, market leading branded goods.

ZENO INVERTER DRIVEN AIR SOURCE HEAT PUMP MODELS

Includes controller, pump & heated drip tray.

WARMFLOW WARMLINK

WarmLink is Warmflow's cloud based technology which provides effortless, easy to use remote control technology for homeowners and engineers. WarmLink allows users to control and monitor their Warmflow Zeno air source heat pump remotely or from the comfort of their sofa.

WarmLink is easy to use and offers a range of features including:

APP CONTROL

Fully control your appliance via your smartphone, tablet or PC.

ERROR CODES

In the unlikely event of a fault, your engineer will be able to remotely review error codes allowing for more efficient diagnosis and speedy response

EASY CONTROL

Easy control of the heating and hot water for your appliance from anywhere in the world to ensure maximum comfort in your home

The WarmLink user interface is now included as standard with all Warmflow Zeno air source heat pumps ensuring the smooth and efficient running of your appliance for many years to come.

Setting up WarmLink access on your smartphone, tablet or electronic device couldn't be easier with a simple to use app available on google play or apple app store. Simply download the app, connect your device and start enjoying the benefits of remote control access to your Zeno air source heat pump.

All Warmflow Zeno air source heat pumps come with a communication module with built in SIM card which automatically connects to the cloud when the heat pump is activated. Simply scan the barcode using the WarmLink app to connect to your heat pump.*

*Warmlink access is currently complimentary and subscription-free; however, charges may apply for this service in the future. GSM access dependant on service provider coverage.

GROUND SOURCE HEAT PUMPS

What is a Ground source heat pump (GSHP)?

Ground source heat pumps (GSHPs) use a loop of pipe, called a ground loop, which is buried in your garden to extract heat from the ground. Heat from the ground is absorbed into the fluid and then passes through a heat exchanger into the heat pump which then transfers heat into your radiators or underfloor system. The length of the ground loop depends on the size of your home and the amount of heat your home requires to remain warm and cosy during the long winter months.

Why Warmflow Zeno?

SINGLE PHASE ELECTRICITY SUPPLY UP TO 18kW
Designed to run from a standard single-phase domestic electricity supply.

QUIET OPERATION
Sound level as low as 47db (A).

VARIABLE SPEED-INVERTER DRIVEN COPELAND COMPRESSOR
Low noise, high efficiency Copeland compressor; the heart of the system.

USER-FRIENDLY INTERFACE
Powerful programmer with unique features to assist the installation, operation and servicing.

VARIABLE SPEED, HIGH EFFICIENCY PUMPS
Fully integrated, variable speed, high efficiency pump for the heating & brine circuits modulates flow to match heating demand and overcome hydraulic resistance whilst maintaining peak efficiency.

INSTALLATION ACCESSORIES AS STANDARD
Includes flexible hoses, filters and 3 port diverting valve.

ELECTRONIC CONTROLLED EXPANSION VALVE
Optimising system efficiency by allowing the heat pump to run at a range of flow temperatures and capacities.

HIGH FLOW HEAT EXCHANGERS WITH LARGE SURFACE AREA
Maximising the heat supplied to the property whilst maintaining high flow rates for efficient operation.

HIGH TEMPERATURE OUTPUT
Flow temperature up to 60°C means domestic hot water (DHW) can be produced without the need for additional heat sources.

SPECIFICATIONS

PRODUCT DATA		GS03
Dimensions (mm)	Width	590
	Depth	660
	Height	890
Weight (kg)		130
Electrical Supply		230V Single Phase@50Hz
Maximum Current (Amps)		32
Nominal Sound Level (dBA)*		47
Ambient temperature min/max (°C)		5/40
Ambient humidity (%)		80
Performance	COP @ B0W35 ^	4.87 @ 8.53kW
	COP @ B0W55 ^	2.99 @ 9.05kW
	Heat Output Range	4.5-18kW
	ErP Efficiency Class (35°C / 55°C)^	A+++ / A+++
Operating Temp (°C)	Brine Flow, min/max	-5/15
	Heating Flow, min/max	30/60
Flow Rates (l/m)	Brine, min/max	20/75
	Heating, min/max	14/60
Pressures (bar)	Brine, min/max	0.5/3.0
	Heating, min/max	0.5/3.0
Refrigerant	Type	R410A
	Charge (kg)	3.10
Compressor Oil	Type	RL32 3MAF
	Quantity (l)	1.5
Connections	Brine Flow & Return	1½" female BSP
	Heating Flow & Return	1¼" female BSP

*Nominal Sound Levels have been independently tested in accordance with EN 12102.

^COP and Heat Power ratings have been independently tested in accordance with EN 14511.

WARMFLOW CUSTOMER SUPPORT

Total peace of mind with our product warranties and dedicated customer support team

At Warmflow we're confident about the quality and performance of all our products and we want our customers to be confident too. That's why all Warmflow products come with comprehensive and industry-leading warranties, backed by our own in-house Customer Support Team.

Whatever your need, our dedicated team of Customer Support specialists is on hand to provide expert knowledge before, during and after sales, taking complete care of all your customer support needs and helping you get the most from your Warmflow product. With Warmflow you'll have peace of mind that your heating appliance is in safe hands.

Full details of our product warranties are available at www.warmflow.co.uk.

TRAINING COURSES

Become a Warmflow Connect installer and gain a number of benefits, including free training for both oil and renewables.

At Warmflow we offer a range of oil and renewable training course to suit all requirements at our training centres.
